

Suns Room

The Suns Room is for Kindergarten, 1st, and 2nd grade students. The classroom is set up as a preschool classroom and students use the planning board to make their choice of activities while in the classroom. Staff in the room change interest areas and children are given the opportunity to explore centers that are of interest to them. The center areas usually accommodate 2 to 4 at one time. This limits the number in any given area at one time and they have the opportunity to start and complete activities according to their interest and attention span. Children this age practice what they see adults model. Decision making, negotiating and appropriate social skills are emphasized.
