

Blue Room

The Blue Room is for young preschoolers 2-3 years old. The room is set up in smaller interest centers. Curriculum themes change each week, along with some of the equipment in the centers. Children have a structured day that includes Circle Time, where they review colors, shapes and read books about the theme of the week. They do finger plays, sing songs, identify their names, read flannel board stories and talk about their activity for the day before they make choices as to where they would like to play. During these choices, they can pick a center that includes art, science, dramatic play, books, large motor, puzzles & games and blocks & cars. There are planned activities that encourage large and small motor skills, cognitive development, self help skills, social skills and most of all fun. Toilet training may begin and become a part of our day, but only when the child shows physical signs of being ready. The group size is 12 children in the Blue Room.

We look forward to meeting you!!
