

Red Room

The Red Room is for older 3 year olds and young 4 year old preschoolers. The room is set up in small center areas where typically 1-2 children can interact at one time. Children have a structured day that includes Circle Time where they focus on the theme of the week, conversations with one another, the day of the week, weather, spelling our names, classroom rules and routine and center choices. Children make choices as they pick centers that include art, science, dramatic play, dollhouse, table toys, books, large motor, puzzles & games as well as blocks & cars. There are planned activities that encourage large and small motor skills, cognitive development, self help and social skills and self expression. This age group starts to settle down and concentrate more on table activities of puzzles, printing, tracing, cutting, games and creating projects that reflect their weekly curriculum theme. The group size is 20 children in the Red Room.

We look forward to getting to know you!
